Bee united.

We're all in this together!

Valley Bee Community Health and Safety Induction Native Social Stingless

1) To ensure that all volunteers are covered by the MRCCC's Public Liability Insurance, each participant needs to take steps to ensure their own safety and that of others involved in Valley Bee activities.
2) Each participant must be signed in, and their contact details provided in the unlikely event of an emergency.
3) All participants should have covered footwear and are free to make use of veils provided by the club when at the hives.
4) All participants are asked to take care around hives and follow directions of the instructors.
5) Native bees can sting or bite but are not considered aggressive. They will fly about and may try to enter eyes, ears, nostrils or under clothing. Veils are recommended.
6) A native may sting and this may cause an allergic reaction to some. Notify a Valley Bee member immediately if you have any concern or major swelling occurs. The club carries a first aid kit and Epipen.

Note: Valley Bees wish to advise that photos of workshop activities may are taken on the day. Images may be used, published or reproduced by Valley bees, in whole or part, and by any medium, including but not limited to newspapers, magazines, brochures, websites and social media to publicise, promote, advertise and report on the event. If you do not want your image recorded, please notify the instructor of the day.
